

Tri-color cartridge test

Print at 100% (Actual size) with headers and footers turned off.

printertestpagelab.com

/color-test-page/ · US Letter

The three inks at 100, 75, 50, 25 and 10%

Two-ink mixes

Red = magenta + yellow

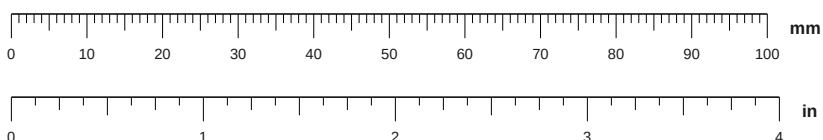

Green = cyan + yellow

Blue = cyan + magenta

Gray patches

On printers without a black cartridge, these grays are mixed from all three inks, so a tint here shows which ink is off.

Scale check

Measure both rulers. If they read 100 mm and 4 in, the page printed at true size. Each corner cross should sit 10 mm from both edges. A missing cross means cropping.
